## The Cotswolds.

The Cotswolds are a range of limestone hills running over 50 miles in a north-easterly direction from Bath. There are hundreds of villages in the area that are made entirely out of Cotswold Stone, making them very attractive and popular with tourists. At one time, there were dozens of quarries mining the stone, Taynton quarry - near Burford - was the source of the stone used in the building of the Oxford University colleges. Corsham quarry supplied the stone used in buildings in Bath, whilst stone from Minchinhampton was used for the Houses of Parliament. Due to the strict building regulations in a conservation area, there are still a good number of quarries in the region, extracting the stone for repairs and for the construction of stone walls and new buildings.

**Bourton-on-the-Water** is known as the Venice of the Cotswolds because of the five bridges that cross over the River Windrush that flows through its centre. It is the most visited village of the Cotswolds as there are many things to see; Bourton's Model Village is a one-ninth scale model which is so meticulously well detailed that it even has a model village of its own.

The queen of crime, Agatha Christie, is said to have stayed at the Mousetrap Inn whilst writing her successful stage play of the same name in 1952. The play has since become the longest running stage play ever and is still being performed at St. Martin's theatre in London's West End. Bourton's Cotswold Perfumery have made personalised fragrances for Her Majesty Queen Elizabeth II.

### Northleach.

Centred around the 15th century Market Place, Northleach is a thriving Cotswold town and it is also the smallest town in England. It is said that beneath the houses and streets of Northleach runs a maze of stone vaulted tunnels. Whether this was the result of mining or some more obscure activity remains unknown.

Built in the 1790s, Northleach's Prison was regarded as a radical change in the approach to the prison system as it was the first to separate petty offenders from serious criminals.

In Aug 2014, filming began in Northleach for the BBC production of J.K. Rowling's *The Casual Vacancy* with the marketplace being transformed into the pretty fictional town of Pagford.

A charming small town, **Burford** is a mere 20 miles west of Oxford and fifty years ago was second only to Newmarket as a horse racing centre. The town is home to wonderful individual shops and Reavely's, the oldest pharmacy in England, which dates back to 1734. Burford is popular with visitors for its beauty, history and also for shopping, especially antiques.

During the English Civil War, there was a group of activists known as Levellers who challenged the authority of Parliament and it was in Burford that they were rounded up and imprisoned by Oliver Cromwell in 1649. Three of them were executed in the churchyard and the bullet holes from that siege can still be seen to this day. On the Saturday closest to 18th May every year, Burford marks this event by celebrating 'Leveller's Day' with a carnival.

### Nailsworth.

The artistic town of Nailsworth nestles in a wooded valley to the east of Stroud and is renowned for its selection of award-winning restaurants, pubs and cafes. The Sunday Times has listed Nailsworth as one of the top ten best places to live in Britain.

One of the town's delightful quirks is its town crier, who announces events such as the four-weekly farmers' market and Nailsworth Festival of arts each May. Dating back to the 12th century, the town built much of its prosperity on the back of the mills that line its waterways. Many - such as Egypt Mill - have since been converted to hotels or flats.

Right at the top of Nailsworth is New Lawn, home of the town's football club, Forest Green Rovers. Founded in 1889 and known as 'the little club on the hill' have reached new heights in 2017 by winning promotion to the English Football League for the first time in their history. The club is the first club in the country to serve all vegan food and drink at their ground.

Nearby is the haunted Woodchester Mansion.
